Good afternoon students,

This email is to inform you of an update from the Council on Social Work Education (CSWE) that was announced today, March 25, 2020. For students whose field completion dates occur by December 31, 2020, they are reducing the required number of hours to 85% of total hours.

For our BSSW students who fall into this category, you are now only required to complete 340 hours of field total.

For our MSW II/ASAP students who fall into this category, you are now only required to complete 545 hours of field in your 7189 practicum.

We hope that this change will provide some additional flexibility in reaching your required hours. We are asking that you create a termination plan with your agencies. Please make every effort to bring projects to completion by notifying your colleagues of your anticipated last day and providing appropriate closure with individuals. Once you have reached your hours, please work with your agency field instructor to complete the required paperwork (Learning Agreement, Supervision Log, and timesheet) and reach out to your liaison with specific questions.

With this reduction in hours, you will have a lower number of supervision logs required for completion (8-10 total).

If you have questions about the current status of field education during the COVID-19 crisis please review information here under the Field Education section.

Take care,
Katie
